## SUMMARY

Generative AI Engineer with ~2 years of experience building and shipping production LLM and Voice AI systems. Hands-on with agentic workflows, MCP tool calling, RAG, multi-provider LLM integration, voice agents, STT/TTS, agent orchestration, and structured LLM evaluation.

## WORK EXPERIENCE

**Chat360** Pune, Maharashtra

Gen AI Engineer Feb 2026 - Present

- Contributed to the design and deployment of production Voice AI backends for LLM-driven conversational agents, collaborating with client, product, and platform teams.
- Engineered MCP-based agentic workflows integrating 20+ external APIs across 3+ clients for real-time enterprise system interactions during live voice conversations.
- Integrated and benchmarked STT/TTS providers (Azure, Sarvam AI) for Indian-language and code-mixed telephony audio, and ran structured prompt engineering and LLM evaluation cycles to reduce agent error rates by 25% across multiple test calls.
- Implemented DTMF handling and voicemail detection, cutting wasted outbound call minutes by 75%; built analytics pipelines for RCS campaign dashboards that client teams use to optimize targeting
- Implemented production observability using Grafana and Loki to monitor voice-agent latency, tool-call failures, transcription quality, agent errors, and call outcomes, enabling faster debugging and iterative system improvements.

**VDOIT Technologies** Gurgaon, Haryana

IT Associate (Backend and AI/ML Developer) Jan 2025 - Feb 2026

- Contributed to a production Agentic RAG educational chatbot with voice chat for a client, implementing LangChain agent tools for quiz/course generation and student knowledge-base retrieval over tenant-uploaded documents, backed by Qdrant and deployed across 20+ institutions.
- Built a Stripe payment system on AWS Lambda with 3-tier pricing packages, coupon management, and webhook handlers, enabling flexible subscription plans and reliable, event-driven transaction processing.
- Migrated legacy components from Python/DynamoDB to Node.js/MongoDB, improving API response times by up to 80%; containerised a template-to-file generation service on AWS ECR, eliminating a third-party dependency and 100% of its recurring licensing cost.
- Provisioned AWS EC2 environments for Flask/Node.js services and automated CI/CD with GitHub Actions, cutting manual deployment time by 90%.
- Standardised AWS Lambda setup with reusable templates, reducing provisioning time by 95%, and added an EventBridge-scheduled cleanup Lambda that deleted temporary files on a schedule and cut costs by 10%.

## SKILLS

**Generative AI & LLMs:** LLM API Integration, Agentic AI, Tool Calling (MCP), Agentic RAG, Prompt Engineering, LangChain, LLM Evaluation, Voice Agents, STT/TTS (Azure, Sarvam AI, ElevenLabs)
**Backend & APIs:** Python, Node.js, FastAPI, Flask, REST APIs, Webhooks, SQL, Unit Testing
**Databases & Vector Search:** Qdrant, MongoDB, PostgreSQL, MySQL, DynamoDB
**AWS & Serverless:** Lambda, API Gateway, EventBridge, ECR, EC2, S3, DynamoDB, IAM, Step Functions
**DevOps & Tooling:** Docker, Git, GitHub Actions, CI/CD, Azure

## EDUCATION

**NIIT University** Neemrana, Rajasthan

B.Tech, Computer Science Engineering 2021 - 2025
